Comment: FIFA 22 introduces a wide range of new gameplay modes, visuals and enhancements, including: FIFA Ultimate Team, updated squad and league editor, Career Mode, Skill Games, Team of the Year and new online seasons, additional offline tournaments, and more. Experience authentic football like never before with FIFA 22. A decent game; The Career Mode is nicely done and has a lot of options. The game mechanics are fine, the AI is awful, meaning that you can beat any player in the world 99.9% of the time, and with relative ease. The new 'minor' leagues and how you can build a team from top to bottom are interesting and new, however a lot of the small improvements and new features actually sort of don't add up to anything. Minor League Sports and such are just re-balanced for the sake of balance, including the ICL. Take for example, Lionel Messi and his new special ability that he can control from the midfield. The Career Mode basically just involves spending everything you make and playing out a few games. You can choose on a weekly basis how much to allocate to each area, and the player's stats increase each week. Overall, the Player Creator, Champions League, Manager Mode and Tournament Editor are the real gems, but the rest are almost completely ignored. I think I'll be holding off on buying for now until EA get's their shit together. A decent game; The Career Mode is nicely done and has a lot of options.
